

- Highest evaluation results from German testing institutions, such as PTB, MPA and TÜV Berlin.
- Anti scratch, anti-fog, and antireflex coating
- Increase resistance to chemicals; transparent metallization of high-value substrates

Planning new projects?

We are an innovative team and would be glad to advise you.

Why not make use of our know-how regarding various surface phenomena? Thus, many "dead-ends" can be avoided beforehand.

Akzente has gained superior surface treatment knowledge during the past 14 years. Our products are trend-setting, not only with regard to their usability, but also in complying with highest ecological standards.
